

The International Doctoral School (IDS) at Lodz University of Technology offers science and technology doctoral programs that can be conducted at one of our faculties.

We welcome applications of university graduates holding a Master degree (or equivalent) in a scientific or technological discipline, who wish to work towards a PhD within the scope of the IDS.

More information about the school here:

<http://ids.p.lodz.pl>

and here are the groups looking for students, including quantum chemistry and computational chemistry ones:

<http://ids.p.lodz.pl/supervisors>

Financing is possible through University's scholarships and frequently also through grants of particular supervisors.
